

This movie seems to be purely a propaganda instrument, totally distorting and denigrating John Kerry's record, not offering any useful news or information. Sinclair should not be allowed to force its stations to show this kind of distortion. Also, the fairness doctrine should be enforced. If this is to be shown, it should be balanced by a showing of Fahrenheit 9/11, which does show actual well-documented facts and news, and which Michael Moore has offered free to Sinclair if they would show it. Please make some attempt to impose fairness here.
